Foresite Google Cloud

Defend against today's and tomorrow's threats at Google scale

Foresite and Google Cloud offer a unified approach to cybersecurity, combining Google Cloud's robust security infrastructure with Foresite's expertise in Google Cloud Security. This collaboration provides organizations with a proactive, efficient, and expert-driven security strategy that leverages AI and automation to combat evolving threats.

Foresite is among a select group of organizations globally recognized for deep expertise and exceptional delivery of security outcomes with Google Cloud Security. Learn how Foresite and Google Cloud empower businesses to transform security from a barrier into a catalyst for growth.

Google SecOps

SecOps offers a unified experience across SIEM, SOAR, and threat intelligence to drive better detection, investigation, and response. Collect security telemetry data, apply threat intel to identify high priority threats, drive response with playbook automation, case management, and collaboration.

Google Threat Intelligence (GTI)

Get ahead of the latest threats and respond in minutes, not weeks. Blanket your event data with threat intel associations to reduce gaps.

Security Command Center Enterprise

Complete multi-cloud CNAPP security with virtual red teaming, and built-in response capabilities - supercharged by Mandiant expertise and Gemini AI at Google Scale.

Mandiant Defense

Proactive hunts for ongoing or past breaches, and respond before attacks impact your business.

Model Armor

Enhance Security and safety of AI applications by screening LLM prompts and responses for various security and safety risks.
